

About our Sterile Compounding Laboratory

Town and Country Compounding and Consultation of Ridgewood, New Jersey, specializes in pharmacy compounding, which is the traditional method of preparing customized medications to meet unique physician and patient needs.

Unlike typical pharmacies, **Town & Country Compounding** has a dedicated compounding laboratory which utilizes modern state-of-the-art equipment and technology, innovative medication dosing devices and high-quality ingredients. We consistently obtain only the best quality ingredients from known and trusted sources that employ a team of chemists who routinely test the ingredients for purity and consistency through out their preparation process.

All sterile medications, i.e., injectables and ophthalmic medications, are prepared to the **USP<797>** standard for Sterile Products under one of our **ISO Class 5 laminar hoods**. These **ISO Class 5 laminar hoods** are located in our isolated **ISO Class 6 Clean Room**. **Only pharmacists who have received specialized training to the USP<797> Sterile standard will compound sterile medications.** All compounding pharmacists and certified pharmacy technicians have gone through extensive compounding training and pride themselves on the quality of their work.

In addition to meeting the requirements of USP <797>, we have taken an advanced step, by assuring our compliance to USP <797> by using the **SIMPLIFI <797>** software by Pharmacy One Source. **SIMPLIFI <797> software is a complete quality system to assure measurement and compliance to the USP<797> standard for sterile medications.**

Town & Country Compounding Pharmacy is honored to have received **ACHC Accreditation**. (**Accreditation Commission for Health Care**.) We have achieved this stringent Accreditation in an effort to provide comfort and assurance to our patients and physicians. Certificate is available upon request. Please visit our website at www.tccompound.com for more detailed information, or go to ACHC's website at <http://www.achc.org>

Town & Country Compounding pharmacy is a **Dynalabs Center of Excellence , CQI Partner**. **CQI is a Continuous Quality Improvement Process, to measure, test, and document, our processes and formulations. See sample test report with test results on Potency; Purity; Sterility (Bacteria/Fungi)**

In the Northeast part of the United States, there are very few Compounding Pharmacies that have achieved this distinction. Certificate is available. Visit our website for more detailed information at www.tccompound.com
