

The Importance of Choosing the Right Compounding Pharmacy

TOWN & COUNTRY
Compounding Pharmacy
We compound quality

Our accreditations place us in the top 1% of compounding pharmacies

Where you get compounded medications makes a big difference in health outcomes.

Unlike commercial drugs from a retail pharmacy (that will have the same quality no matter where you buy them), the quality and effectiveness of compounded medications can vary widely from pharmacy to pharmacy.

Do you know where your compounded medications are made?

Practitioners see the difference

Town & Country Compounding is head and shoulders above the rest.

Town & Country Compounding's LDN titration kits have helped my success rates in managing pain in patients with autoimmune diseases.

Dr. Asher Goldstein, MD

Town & Country Compounding makes customized medication at the highest level.

Their high-tech labs, expertise, and rigorous compounding protocols give me confidence that my patients are getting the best quality compounds.

Dr. Phillip S. Kim, MD

I recommend Town & Country Compounding to all my patients.

Their facility is top-notch. They've got a beautiful new lab.

You can rely on their compounded medicine.

Dr. David Wertheimer, MD

Town & Country Compounding's commitment to quality is the best in the area.

I checked out the processes at their lab and was impressed.

Patients feel better when they use medicine from Town & Country.

Dr. Warren Slaten, MD
