QUALITY MATTERS

To ensure the highest quality products, we conduct extensive third-party testing on our GS formulations, including rigorous assessments for sterility, and endotoxins and potency. This dedication to quality means you can trust our GS for your feline patients.

URGENCY MATTERS

We understand the urgency of starting treatment for FIP, which is why we strive to have your medication ready the same day or within 24 hours. Please note: a veterinary prescription is required to fulfill your order.

RELAPSE GUARANTEE**

Town & Country Compounding Pharmacy firmly believes in our products. If your cat relapses after completing an initial 84 day course of treatment, meds will be provided at 50% off.

**This offer is only valid with a veterinary prescription and proof of relapse (provided by your veterinarian).
